## Objective

I'm a passionate and motivated software developer with expertise in web development, C, C++, Java, MySQL, React, and SQL-based data analysis. I love building innovative applications and working with dynamic teams to tackle complex technical challenges.

## Education

|                                                                                        |                                                 |
|----------------------------------------------------------------------------------------|-------------------------------------------------|
| <b>YBN UNIVERSITY</b><br><i>Bachelor of Technology in Computer Science Engineering</i> | <b>Ranchi, Jharkhand</b><br><i>2023–Present</i> |
| <b>RK GOVIND +2 HIGH SCHOOL</b><br><i>Intermediate</i>                                 | <b>Garhwa, Jharkhand</b><br><i>2021–2023</i>    |
| <b>HIGH SCHOOL KIKRA DANDA</b><br><i>Matriculation</i>                                 | <b>Garhwa, Jharkhand</b><br><i>2020–2021</i>    |

## Skills

**Programming Languages:** C, C++, JAVA, Python(Strong foundation of Object Oriented Programming)  
**Libraries:** Pandas, NumPy, Scikit-learn, Tensorflow, Matplotlib  
**Development Technologies:** HTML5, CSS3, JavaScript, ReactJS, Node.js, MS-SQL, React Native, MongoDB, PostgreSQL, .net  
**Soft Skills:** Problem-Solving, Time Management, Good Listener, TeamWork  
**Tools:** VS Code, Visual Studio 2022, Code::Blocks, Git, GitHub, Postman, Swagger, Jenkins, Docker, VirtualBox, ClickUp, Anaconda, Overleaf, MS-DOS, Linux OS

## Experience

|                                                                                                                                                                                                                                                                                                                                                                                              |                                             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>Eimple Labs</b><br><i>Node.js Developer Intern</i>                                                                                                                                                                                                                                                                                                                                        | <b>Remote</b><br><i>June 2024 – 2025</i>    |

| <ul style="list-style-type: none"><li>○ Built full-fledged, responsive website UIs using ReactJS and Material UI (MUI).</li><li>○ Implemented global state management using Redux for scalable applications.</li><li>○ Developed reusable UI components and optimized application performance.</li><li>○ Ensured seamless API integration, form validation, and secure user flows.</li></ul> |                                             |

## Projects

**Research on Foundation of Common Sense Knowledge:**

- Studied principles of common sense reasoning in Artificial Intelligence.
- Analyzed knowledge representation techniques for real-world understanding.
- Explored inference mechanisms to improve machine decision-making.

## Extra-Curricular Activities

- Active member of the Coding Club at YBN University, Ranchi.
- Organizing member of Design Hackathon 2024 at YBN University, Ranchi.
